Global X US Tech Dividend Aristocrats ETF

As of 12/30/2024

FUND OBJECTIVE

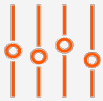

The Global X US Tech Dividend Aristocrats ETF seeks to provide investment results that correspond generally to the price and yield performance, before fees and expenses, of the S&P Technology Dividend Aristocrats Index (TTM) (JPY) TR.

KEY FEATURES

Potential for Growth and Dividend Increase

Technology companies which have increased their dividends over the long term consecutively, can be expected to have the capability to generate stable earnings supported by their high competition and sophisticated business models. In addition, they are likely eager to return their earnings to shareholders through dividends. Thus we can expect them to not only grow but also increase their dividends further.

Risk-Minded Approach to Growth Stocks

Companies which have stable earnings growth can relatively be expected to hold resilience in a volatile market.

Quarterly Distributions

The Global X US Tech Dividend Aristocrats ETF makes distributions on a quarterly basis.

Fund performance assumes that dividends (before taxes) are reinvested in the fund. NAV value is calculated after deducting trust fees. In the graph, the value of (S&P Technology Dividend Aristocrats Index (TTM) (JPY) TR) is modified to match the fund NAV at the time of inception. The performance data quoted represents past performance and does not guarantee future results. Investment return and principal value of an investment will fluctuate so that an investor's shares, when sold or redeemed, may be worth more or less than their original cost. High short term performance of the fund is unusual and investors should not expect such performance to be repeated.

Investment Risks

The Fund will invest in financial instruments whose prices fluctuate and as a result the NAV per unit of the Fund will also fluctuate. Therefore the invested amount will not be guaranteed and a loss of principal may be caused. All the gains and losses accrued to the trust assets will be attributable to the investors. Investment trusts are not deposits.

Major factors to cause fluctuation of NAV per unit:

Stock Price Volatility (Price Volatility risks / Credit risks), Exchange risks, Country risks, Other risks

The performance of the NAV may not completely match that of the index. The factors to cause fluctuation of NAV per unit are not limited to those mentioned above. Please read "Investment Risks" in the fund's Prospectus describing in detail.
